

SPACE 2

Space 2 is the largest of our sensory rooms, designed over two levels connected by a slide, stairs, and a clamber zone, with two hoisting to all areas. There is an external lift to allow those with low mobility to access the upstairs areas, experience height and watch activities happening below through the glass window. Space 2 has similar specialist equipment to Space 1, with the addition of:

- An illuminated ball pool
- An interactive 70-inch TV screen
- Sensory integration equipment
- Amazing projection experiences – including the whole back wall of the room
- A giant bubble tube controllable by switches
- Trampoline and balance beam
- Integrated wind machine
- Switches for interactive work
- Cameras for increasing self-awareness
- Interactive floor and wall projection, Omi Vista and Reflex

The room is extremely flexible to meet many differing needs by use of an iPad control system. Carers can select a theme to take their clients to a tropical beach, a pop concert, or into space! Alternatively, carers can use one stimulus at a time to assess and develop the use of each sense within the sensory room. Once sensory preferences are established, this knowledge can be used to enhance the quality of people's lives at home and in the outside world.

Space 1 is particularly beneficial/useful for:-

- Those who are very active and need an environment in which to move safely (both upstairs and downstairs areas have padded floors)
- Providing movement experiences that are not accessible in the real world (Please note: hoisting is available in the under-mezzanine area only, giving access to the water bed, ball pool, bubble tubes, swing and vibration mattress. Those who need hoisting cannot access the upstairs area)
- Increasing confidence and motivation to move and experience new stimuli
- Providing a world of multi-sensory stimulation
- Enabling sensory assessment in a distraction-free environment
- Encouraging relaxation in a calm and controlled atmosphere
- Developing cause and effect by use of switch work leading to improving life skills
- Encouraging communication skills and choice making
- Improving social and emotional skills
- Decreasing challenging or stereotypical behaviours
- Improving mental health and wellbeing

BOOKING IS ESSENTIAL – Please contact us to discuss your needs for a session
